**Bmbspace**

INVEST IN BITCOIN MINING

# Bmbospace

## Enhance portfolio diversification through

*In a constantly evolving financial world, Bitcoin mining offers both stability and profitability. Bmbospace provides a turnkey solution, designed for investors, wealth management advisors, and private investment clubs, combining simplicity, profitability, and transparency*

## Key numbers

➔ **Cryptocurrency market** : 5.70 billion USD in 2024, TCAC of 13.1% until 2030

➔ **Mining market** : 2.44 billion USD In 2025, projected to 4.43 billion USD by 2032 (TCAC 8.9%)

➔ **Mining equipment** : 15 billion USD in 2023

## What does this mean for you?

➔ **An opportunity for diversification with high potential, supported by a growing market.**

# Bitcoin, an unavoidable asset

## Focus on trends

**Bitcoin Treasury Companies:** Businesses are increasingly integrating Bitcoin as a reserve asset to diversify their treasuries and hedge against inflation. For instance, MicroStrategy holds more than 252,220 BTC. As of February 2025, 80 publicly listed companies collectively owned 632,381 BTC, equivalent to USD 55.89 billion, confirming strong institutional interest ( Source: coinshares.com, 2025).

*Bitcoin is redefining investment strategies, driven by institutional adoption and a robust infrastructure. For investors, it provides a unique diversification compared to traditional assets.*

## Growth factors:

➔ **Institutional Adoption:** BlackRock and Fidelity validate Bitcoin through ETFs (Source: Bloomberg, 2024).

➔ **Blockchain:** A secure technology for decentralized finance (Source: Deloitte Blockchain Survey, 2024)

➔ **Macroeconomics:** An alternative to inflation and fiat currencies (Source: CryptoVision Q1 2025, page 3)

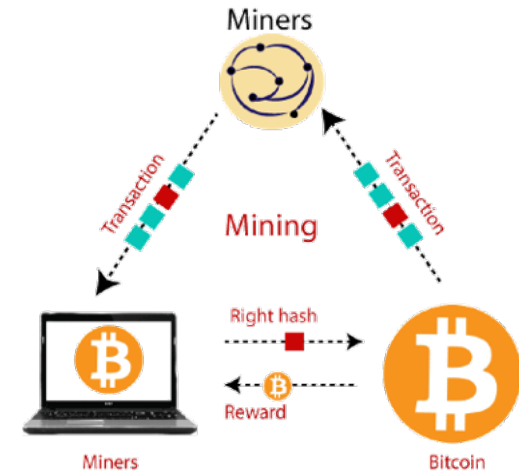

## Some data

➔ **Growth +540 000 %** Between 2012 and 2022, recent price at 104,371 USD (Source: CoinGecko, May 2025).

➔ **Hash Rate: +394%** since 2020 (Source: Glassnode)

# Mining, a Winning Strategy

*Mining is the process that secures the Bitcoin blockchain, validates transactions, and generates passive income. For investors, it offers gradual exposure, making it ideal for wealth portfolios and investment clubs*

## Investor Benefits:

- **Low correlation with traditional assets** (BTC/S&P 500 coefficient: 0.18, Source: Bloomberg, 2024).
- **Leverage Bitcoin's appreciation** with a reduced acquisition cost.

## What does this mean for you?

Invest in an asset secured by a robust global infrastructure, while simultaneously embracing a desire for sovereignty over your stores of value.

## Mining function

- **Security:** Miners protect the Bitcoin network against fraud, making majority (51%) attack economically and technically unfeasible. Controlling 51% of the global hashrate (650 EH/s in 2025) would require billions of USD in equipment and energy, a prohibitive cost compared to the limited gains (Source: Glassnode, 2025; Nakamoto Institute, 2024).
- **Validation:** Each transaction is verified and recorded in transparent blocks, ensuring the integrity of the network.
- **Rewards:** 3.125 BTC per block in 2024, with a halving scheduled for 2028, reducing the reward to 1.5625 BTC, thereby increasing scarcity.

# Bmbospace: A Complete Turnkey Solution

*BMB transforms Bitcoin mining into an accessible and profitable opportunity through Bmbospace, its platform and turnkey service. Designed to facilitate engagement from beginners to wealth management advisors and investment clubs, our offering combines flexibility, performance, and peace of mind, removing all technical complexities*

BMB Space provides you with support from a dedicated consultant within our company

## Key services

➔ **Wide Range of Investment Plans:** Choose from our investment plans, selecting the duration and amount you wish to invest. The Asic machines, including the Bitmain Antminers we provide, offer you a guaranteed fixed annual net income ranging from 16% to 22%.

➔ **End-to-End Service:** From selecting the machines for your investment plans to personalised configuration, installation, 24/7 maintenance, and dedicated support, we manage every step to ensure a seamless experience.

## Growth factors:

➔ Offer your clients a high-yield, effortless investment, supported by personalised guidance and transparent reporting.

➔ Allocate your investments across a robust infrastructure, compatible with multiple machines and cryptocurrencies, to diversify your portfolios.

## What does this mean for you?

Save time, maximise your returns, and invest with complete confidence thanks to a fully managed solution tailored to your financial strategies.

# Strategic diversification

*Diversification reduces risk by spreading investments across uncorrelated assets. Bitcoin mining, a productive asset, offers unique diversification, protecting against inflation and fluctuations in traditional markets, while capitalising on Bitcoin's increasing scarcity*

## Why diversify with mining?

→ **Low Correlation:** Bitcoin shows a correlation of 0.18 with the S&P 500, compared to 0.80 for equities, stabilising portfolios against market shocks (Source: Bloomberg, 2024; CryptoVision Q1 2025, page 5).

→ **Optimised Returns:** Allocating 1–5% to mining improves the Sharpe ratio from 0.23 to 0.44, enhancing risk-adjusted returns (Source: Venn by Two Sigma, 2023).

→ **Corporate Treasury Phenomenon:** 3.5% of S&P 500 companies, such as MicroStrategy (252,220 BTC), hold Bitcoin.

→ **Advantage of Mining with Bmbospace :** Your investment yields a net annual return of 16% to 22% under a guaranteed contract. Based on projections of Bitcoin's value up to 31 December 2026, you could earn an additional 40% to 50%. By investing at today's acquisition cost, you secure financial stability without bearing mining expenses, while positioning yourself to benefit from the future growth of Bitcoin.

## Value proposition

→ **For WMAs :** Provide your clients with a secure and profitable asset, easy to integrate into diversified portfolios.

→ **For Clubs :** Prepare for the 2028 halving with a high-yield strategy, strengthened by institutional adoption.

## What does this mean for you?

**Reduce risks, enhance returns, and align with a major institutional trend through mining.**

# Bmbspace : Competitive Infrastructure

*Our facilities in Northern Canada offer a competitive advantage thanks to ultra-competitive energy costs and a sustainable option. These locations were carefully chosen for their position in a country with undeniable geopolitical stability*

## Strengths

- ➔ **Electricity** : \$0.06/kWh in Canada, allowing you to maximise your returns.
- ➔ **Sustainability** : 100% renewable energy in Canada, ideal for investors seeking a sustainable solution
- ➔ **Maintenance and Security**: Our farms ensure on-site machine maintenance by specialists, as well as enhanced security, with no additional management costs.

## Why is this fundamental?

Electricity costs, as well as site security, are the two key variables to ensure mining profitability and provide peace of mind in the proper management of your equipment over time.

# All your data in one place

## Main features

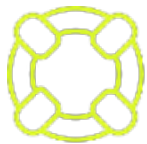

- ➔ **Invoice Management:** We handle all costs associated with your mining, allowing us to offer you a guaranteed fixed return.
- ➔ **Electric Performance Monitoring:** Our role is to manage and monitor the energy consumption of each machine, ensuring optimal efficiency thanks to our competitive rate of \$0.06/kWh.
- ➔ **Earnings per Machine :** Our facilities ensure on-site maintenance by specialists and enhanced security, all covered by us.
- ➔ **Portfolio Management :** Set up and verify your receiving addresses (e.g., Bitcoin via BITGET or Ledger) in a few steps, ensuring fully secure payments.
- ➔ **KYC/KYB Compliance :** Simplify identity verification for you and your banking partners, meeting regulatory requirements through a secure process.

## Why is this crucial?

- ➔ Offer your clients transparent, effortless management, with clear reporting to strengthen their confidence
- ➔ Manage complex portfolios with a scalable platform, integrating all data for informed decision-making.

# Experience of trust and transparency

Bmbospace ensures a secure experience with efficient customer support, multi-year warranties, and a WIN-WIN affiliation. Whether for the advisory entity, the client, or our suppliers, our model is designed to serve each party in the best possible way, in record time

## Support

Our consultants and documented AIs respond in less than 24 hours

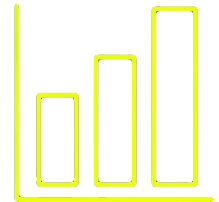

## Garanties

A full 48 month warranty unique on the market

## Commandes

The physical installation of your machines in our mining unit in Canada is fully carried out in a maximum of 72 hours.

## Bourse interne

Bmbospace puts at your disposal a resale exchange for your miners. At any time, you can sign up for our exchange and resell your miners within 60 days

# Act now

***Anticipating the 2028 halving, position yourself to capitalise on Bitcoin's scarcity.  
BMB Space provides you with a secure and profitable solution.***
